

M3P Quickie - Creating a new Page in M3P from scratch

Starting a Page on a new subject is easy. However, it is encouraged to first check if a title page on your subject already exists on M3P. This is easily done by typing the title of your page in the **SEARCH** box (left-hand side) and click on the **SEARCH** button. If your search is found, it means that a page already exists.

STEP 1	Log in at www.m3p.com.mt	
STEP 2	In the SEARCH box, type in your proposed new Page title.	
STEP 3	<p>Click on the SEARCH button. This will take you to the Search Results page.</p> <p>Here you can check for any pages that already exist on the subject you plan to write about, or that have the same title. Try changing your title a little, for example, adding a date to it. (e.g. Summer Concerts becomes Summer Concerts - 2011)</p>	
STEP 4	Once you have decided on the title of your new page, type it in the Search box and click on the GO button.	
STEP 5	<p>This takes you to a page that says: No page title matches ... and ... There is no page titled 'YourNewPageTitle'</p> <p>Click on ... You can create this page ... and it will take you to your new page.</p>	
STEP 6	<p>Congratulations! You can start writing your new page in the text box provided.</p> <p>Do not forget to click on SAVE PAGE, at the bottom of the page, to save your work.</p> <p>It is advisable to first click on SHOW PREVIEW in order for you to see how your page will appear, before saving.</p>
